

Media Release:

Adani Electricity Mumbai Limited advices kite fliers to avoid flying kites near overhead power transmission lines

Editors Synopsis

- **Kite flying near transmission lines is dangerous and can also lead to power outages**

Mumbai, January 13, 2022: Adani Electricity wishes Mumbaikars Good Health and happiness ahead of the joyous occasion of Makar Sankranti. We hereby also urge caution to kite flyers to refrain from flying kites near overhead power transmission lines.

This cautionary advice is issued in the spirit of a safe celebration.

It is pertinent to note that the kite string or as popularly known as 'Manja', is a good conductor of electricity and can transmit very high voltage if it touches the overhead live wires or even enters the arching zone.

AEML appeals to the consumers and citizens in these areas that if they notice or come to know of any untoward incidences as a result of the unsafe kite flying near transmission lines, the same may please be reported immediately on AEML's dedicated Power Help Line **19122** so as to enable the utility to initiate further necessary action. **Alternatively, they can also reach to our Social Media Handles @Adani_Elec_Mum or visiting our website or Adani Electricity App.**
